

YARDI Executive Dashboard™

Yardi Executive Dashboard provides business intelligence with detailed, visual reporting of all portfolio metrics so managers can easily monitor and guide the performance of their assets. Information can be organized according to a cross-section of user-definable attributes, making it simple to locate and analyze a range of key performance indicators. With Yardi Voyager™ the ability to drill down in real time and see details such as budget, income, rent, and occupancy allows executives to have full visibility and make accurate, timely decisions.

Business intelligence that provides detailed graphical analysis of all key operational and financial indicators, with real-time drilldown to all source data and documents.

Key Features

- Create an unlimited number of configurable Web-based dashboards
- Monitor key operational and financial data from a single screen
- Perform detailed analysis and comparisons with greater oversight in less time
- Configure secure, role-specific layouts for different user types and groups
- Conveniently drill down from the dashboard level into source data
- Export reports with formatting to Microsoft Excel and Adobe PDF

Configurable Web-based dashboards display key performance indicators via extended layouts with easy-to-interpret tables, charts, and graphs.

Confident Decisions

Since data is Web-based, dashboards display changes as they happen in real time and provide context with historical patterns and future trends. This accurate, actionable intelligence significantly improves the speed, efficiency, and confidence executives need to respond to market changes.

Perform detailed analysis for individual properties or entire portfolios with complete drilldown to underlying financials, source data and investor documents.

Custom Configuration

While Yardi Executive Dashboard offers standard dashboard views with dozens of pre-configured KPI reports, you can also customize extended layouts, with role- or group-specific access, so executives at any level can actively view only relevant information. Organize information by a diverse set of attributes, such as property type, geography and investment type, to drive creation of reports, charts, and graphs, with precise detail for intuitive interpretation.
