

## Yardi INSIGHT 2.0 System Requirements

Recommended and minimum hardware and software specifications\* for a Yardi INSIGHT 2.0 system.  
Yardi Systems, Inc. May 2008.

Hardware and software installations and version updates for all listed components require careful planning. Please contact your Yardi account manager or implementer before proceeding.

### BUSINESSOBJECTS ENTERPRISE XI R2 SERVER SPECIFICATIONS

<b>Operating system</b>	Microsoft Windows 2003 Server SP1 (recommended); or Microsoft Windows 2000 Server SP4 (minimum) - with latest service packs and security updates
<b>Processor</b>	Dual Intel Core, Pentium, AMD, or compatible, 3 GHz or faster (recommended) Single Intel Core, Pentium, AMD, or compatible, 1 GHz (minimum)
<b>RAM</b>	4 GB (recommended); 2 GB (minimum)
<b>Free hard disk space</b>	80 GB (recommended); 20 GB (minimum) - RAID 5 or RAID 1+0 configuration
<b>Web Server</b>	Microsoft IIS 6.0 (recommended); or Microsoft IIS 5.0 (minimum), Tomcat 5.0.27
<b>SQL Server</b>	Microsoft SQL Server 2005 (recommended); or Microsoft SQL Server 2000 SP4 (minimum)
<b>Data Access Components</b>	iSeries Access ODBC driver V5R2 or V5R3 MDAC 2.8

### CLIENT SPECIFICATIONS

<b>Operating system</b>	Microsoft Windows XP Professional; or Microsoft Vista all versions; or Microsoft Windows 2000 Professional (minimum; <i>not compatible with Internet Explorer 7.0</i> ) - with latest service packs and security updates
<b>Processor</b>	Intel Core, Pentium, AMD, or compatible, 2 GHz or faster (recommended); 1 GHz (minimum)
<b>RAM</b>	1 GB (recommended); 512 MB (minimum)
<b>Free hard disk space</b>	10 GB (recommended); 5 GB (minimum)
<b>Software applications and components</b>	Microsoft Internet Explorer 7.0, with latest service pack and security updates Java runtime 1.5.0_05 (recommended); Java runtime 1.4.2_06 (minimum)
<b>Printer</b>	Laser
<b>Screen resolution</b>	1024 x 768 or higher (recommended), 800 x 600 (minimum)
<b>Internet connection</b>	Broadband (DSL, cable, ISDN) or LAN-based

- The hardware and software specifications listed in this document are for releases of Yardi INSIGHT version 2.0 software that were available at the time of this publication. As newer system versions are introduced, Yardi reserves the right to update and modify these recommendations.
- The operating system installed on the BusinessObjects Enterprise Server must be a North American version of Microsoft Windows.
- Yardi recommends the use of a dedicated BusinessObjects Enterprise Server. Specifications listed are for 250 concurrent users. If the server will be running additional applications, the recommended specifications should be increased accordingly.
- Hardware, memory, and storage requirements can vary greatly, depending on the number of users, network applications, hard disk sizes, connection type, and other issues. Your organization should regularly review company hardware and software resources and compare them to current system requirements.
- Yardi recommends the use of backup and security components for hardware, data, and application redundancy. This includes backup servers for your Web and database servers, as required. In case of catastrophic server failure, backup servers allow users to work with minimal interruptions in Web, database, and application services. In addition, you should use backup devices for storing your database backup files. As the INSIGHT system is an Internet-based application, good security practices also require the use of standard security hardware and software, such as corporate firewalls and utilities for protection against computer viruses and spyware. Configuration of hardware and application security is the responsibility of the user.
- For computer and peripheral requirements and resources in your organization, contact your system administrator or computer consultant. For additional information about any updates to INSIGHT system requirements, contact your Yardi account manager or implementer.

(\*) System requirements presented herein are accurate and reliable to the best of Yardi's knowledge and belief but are not guaranteed to be so. These requirements are subject to change without notice. Nothing herein is to be construed as recommending any practice or any product in violation of any patent or in violation of any law or regulation. It is the user's responsibility to determine the suitability of any equipment and/or procedure for a specific purpose and to use such equipment and/or procedure as may be necessary and pertinent to the user's organization and business practices.
