“ Yardi Facility Manager and COMMERCIALCafé help us deliver a range of high-quality, convenient services that our property owner customers and their tenants deserve. ”

Gary Shaw, President

The Company

Arcadia Management Group Inc., based in Phoenix, Ariz., performs management and maintenance for commercial properties across the United States. Arcadia is designated an Accredited Management Organization® by the Institute of Real Estate Management® and an affiliate of the National Association of Realtors®.

The Challenge

Improving Tenant Service

Arcadia's success depends on satisfying two sets of customers: property owners and their tenants. Collecting rents and performing property maintenance requires the ability to skillfully accept, process, complete and track hundreds of tenant work orders every day. Arcadia's leaders realized that efficiently dealing with hundreds of properties, thousands of tenants and dozens of banking relationships required upgrading technology associated with the company's tenant service and maintenance operations.

The Solution

Yardi Facility Manager and CommercialCafe

Arcadia enhanced its internal processes and customer relationships by adopting CommercialCafe, which offers tenants the convenience of accessing services including payments and maintenance requests online or on mobile devices; and Yardi Facility Manager, a mobile-enabled solution for managing property maintenance, equipment inventory and inspection schedules.

The Story

Customer Satisfaction and Convenience

CommercialCafe strengthened Arcadia's connection with tenants by making key self-service operations easier. For example, work orders can be submitted as easily from a mobile device as from a desktop and are automatically routed to maintenance teams for prompt attention. CommercialCafe also provides tenants with multiple payment options including credit cards and recurring ACH payments.

“Providing outstanding service and improving our ability to collect rent benefits our properties' owners as well as the tenants,” said Gary Shaw, president of Arcadia.

Along with ensuring rapid and satisfactory responses to maintenance requests, Yardi

Facility Manager gives Arcadia portfolio-wide analytics that help site managers anticipate resource and capital requirements. A user-friendly interface simplifies the inspection process and engages outsourced technicians on properties without onsite Arcadia employees.

"Yardi Facility Manager gives us the flexibility to manage the inspection component of our job efficiently and do a really good job with it," Shaw said.
