Package Descriptions

Yardi eLearning

Yardi eLearning is a comprehensive online learning platform that delivers innovative and intuitive learning management tools and exclusive Yardi software courses and webinars. Web-based instruction delivers consistent training and improves employee learning retention. Online courses save time, travel costs and can be rolled out simultaneously across regional work locations. Once trained, employees have convenient access to Yardi eLearning for on-the-job assistance. Yardi eLearning interfaces with many types of software, including human resources and webinar management solutions.

Yardi eLearning Pro

Take the eLearning package to the next level with Yardi eLearning Pro, which adds support for surveys, digital signatures and externally produced SCORM course files. Surveys in Yardi eLearning eliminate the need for a third-party service and are easy to set up, evaluate and act on without having to leave the university. Digital signatures, powered by Yardi eSign, streamline collection of employee acknowledgements and input without needing to print, scan or copy paper documents. SCORM support allows you to add custom content, assessments and eSign documents before and after the standardized SCORM-based training.

Yardi eLearning Plus

Yardi eLearning Plus includes the Yardi eLearning package and a collection of high-quality, customizable courses covering topics that go beyond Yardi software. Non-Yardi software courses deliver essential knowledge and skills on a variety of competency areas in a highly engaging and interactive experience. Courses are built and maintained with proprietary authoring tools, allowing quick and easy modifications, import policies, procedures and other custom information to ensure employees are receiving all relevant information in a single course.

Yardi eLearning Premium

Yardi eLearning Premium includes everything listed in the Yardi eLearning, Yardi eLearning Pro and Yardi eLearning Plus packages. Yardi eLearning Premium is the complete solution with all options available to develop a training program that achieves your organizational goals and objectives.
