

VIRTUOSO ENTERPRISE

The single platform for managing your CRE portfolio

Give your teams data they can rely on with a single source of truth for accounting that goes beyond the general ledger. Virtuoso Enterprise for Commercial brings leasing, accounting, payments and reporting together in one native platform. Harness the power of AI without exports and integrations so you can operate with data you trust from first lease signature to year end recovery.

ONE CONNECTED PLATFORM

Get the full picture of your accounting data with every line item up to date on a single platform based on Voyager 8.

INSTANT ANSWERS

Use AI across your portfolio to find hidden opportunities, answer complex questions and create interactive reports for all stakeholders.

RELIABLE AUTOMATION

Automate detail-oriented tasks such as invoice approvals with agents built on CRE best practices to save time and eliminate manual errors.

FEATURES

VIRTUOSO ENTERPRISE FOR COMMERCIAL

LEASE MANAGEMENT

Make sure every lease term makes it to the ledger. AI abstracts documents and writes the extracted terms to the tenant record with your team's approval.

CORE ACCOUNTING

Run your portfolio on one source of accounting truth. Every module is native to the general ledger, so nothing needs to be exported, synced or reconciled.

TENANT SERVICES

Collect rent without chasing it. Seamless integration with the tenant portal gives users one easy place to pay and submit requests, updating the ledger in real time.

REPORTING AND ANALYTICS

Use in-platform AI or connect to leading LLMs to build any report or model from live GL data, simply by describing what you need to see.

INVOICE MANAGEMENT

Speed up invoicing and protect AP accuracy. Smart Approval codes each invoice, flags the ones that need review, and updates your GL in real-time.

SUPPORT

Eliminate the software learning curve. AI support chat in-app answers product questions with step-by-step instructions, right from the screen you're on.

EVERYTHING YOU NEED IN ONE NATIVE PLATFORM

Virtuoso Enterprise gives you one source of accounting truth, with everything you need to act on it built in. No integrations. No bolted-on AI. Just a reliable flow of data you can easily trace back to the source every time.
